***İKMİB*** *Istanbul  
Chemicals and Chemical Products  
Exporters' Association*

# ABOUT İKMİB

**Istanbul Chemicals and Chemical Products Exporters' Association (İKMİB)** takes active part in international organizations in order to sustain the professional ethics and cohesion of Turkish export companies in the chemicals industry, helps increase export level, diversifies export products, helps increase products' competitiveness, defends its members' rights and interests and helps them form strong relationship in the international arena and supports them to get into new markets since 1991.

İKMİB covers officially more than 20.000 exporters in chemical industry on a national scale and around 8,000 of them are active members and export around the world. The Association represents efficiently and successfully the Turkish chemical sector with the support of the Ministry of Trade and the Turkish Exporters Assembly in Türkiye as well as in the world.

In the chemical industry with its 16 sub-sectors such as plastics, mineral fuels, oils and products, inorganic chemicals, essential oils, perfumery, cosmetics, pharmaceutical products, rubber, miscellaneous chemical products, dyes and paints, soap and washing product, organic chemicals, fertilizers, glues, İKMİB contributes remarkably to the Turkish economy and export, and also adds value to the country by supplying raw materials for many sectors such as automotive, textile and food.

# ABOUT TURKISH COSMETICS

Turkish Cosmetics Product group includes essential oils, fragrance raw materials, cologne, perfumes, beauty, make-up, skin care, hair care, oral and dental care products, deodorants, shaving and toilet products and soaps which are produced by more than 1400 companies registered in the Ministry of Health.

Thanks to its continuously improving R&D and production abilities, the Turkish Cosmetics Sector has considerable competitive power. Optimal quality and cost alternatives are provided by the sector both for domestic and foreign buyers. International recognition of our traditional know-how in the soap industry gives our country an important competitive edge. The essential oils sector, which supplies manufacturers in the cosmetics industry with key raw materials, has gained significant momentum due to a growing number of producers, increased production scales, and Türkiye's endemic plant diversity led by roses.

In 2022, our sectoral export increased by 20% and reached 1,7 billion USD. Our exports to USA and EU countries which are into our top 10 exporting countries in recent years, highlight the competitiveness of our products in terms of quality and price.
